Statistics

To give perspective, the global audiobook market which was valued at $4 billion in 2020, is estimated to grow to $20 billion by 2030, as per industry experts.

Statistics indicate the number of people using fitness and nutrition apps is set to rise to 825.7 million in 2020, a 26 percent increase in a year. The number of users in the wearables segment is forecast to grow 24 percent year-on-year to 441.5 million.

The global gym industry is worth $96.7 billion in 2020, with more than 184 million gym members in total. 2020 is a true testament to the growing gym industry trends where the global gym industry is worth $96.7 billion.

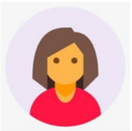

User Persona

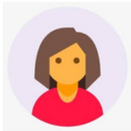

NAME - Hardik
AGE - 19

He is a college-going student he also takes tennis classes and wants to play tennis professionally for that he wants to build his body and physique but after attending his college and tennis classes he doesn't get any time to join a gym and it would also be expensive for him.

NAME - Vidhi
AGE - 28

She is an employee at a multinational company and she is thinking of marriage, but she thinks that her body is not fit and she is a bit overweight, so she wants to lose weight but she doesn't have much time to spare.
She thinks that following a diet plan will also help reduce her weight., but she doesn't have anyone to tell her the diet plan.

NAME - Dimple
AGE - 50

She is a housewife. during the lockdown, she gained some weight and now she wants to reduce that weight. She has a lot of time to do exercise but she doesn't have the motivation to do that.

PAIN POINTS

Fixed schedules

Join the Gym is the little things that you do each day that add up to being healthy and fit. But with a tight schedule balancing work and personal life, it becomes very difficult for most people to go to a gym.

High gym rates

Nowadays gym rates are very high and many people cannot afford that. They also have to pay extra if they want a private trainer

Insufficiency of professional training

Every person cannot access the information about how athletes and sports personalities train for their fitness. A fitness workout app like this can be like a boon for them at that time.

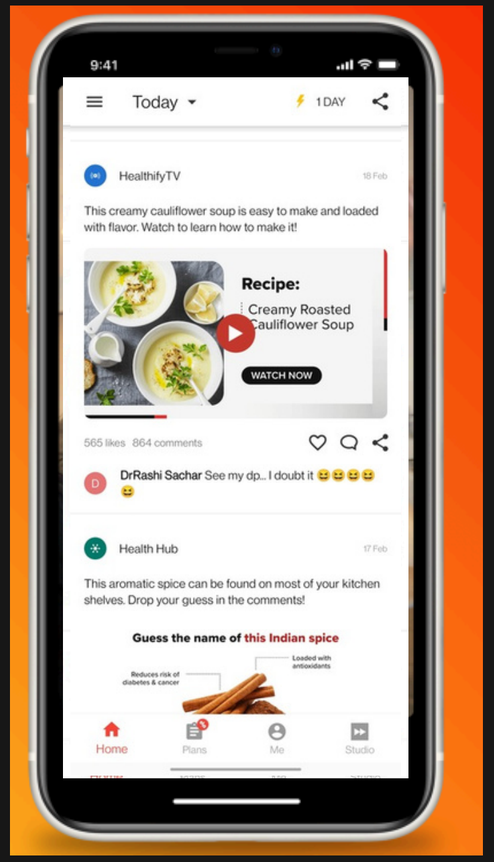

Inaccurate information

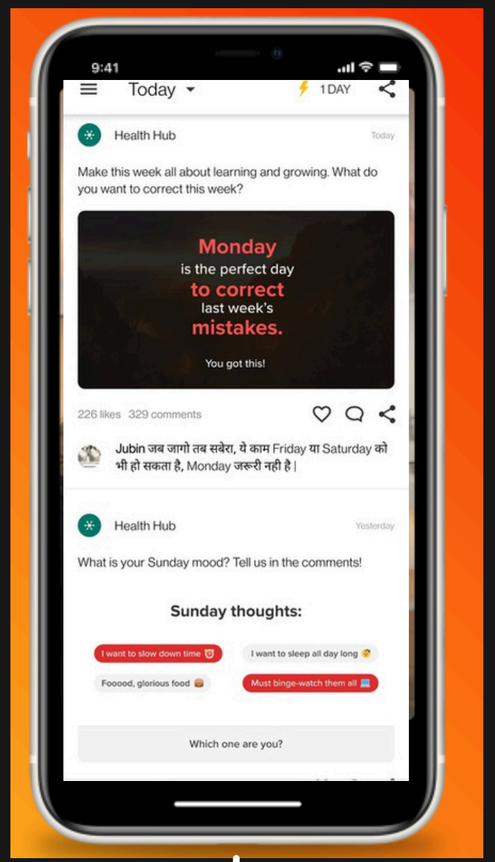

There are a lot of blogs and articles available on the internet about health and fitness tips. Sadly, as the internet is available everywhere and to everyone, it is exposed to have incorrect information as well.

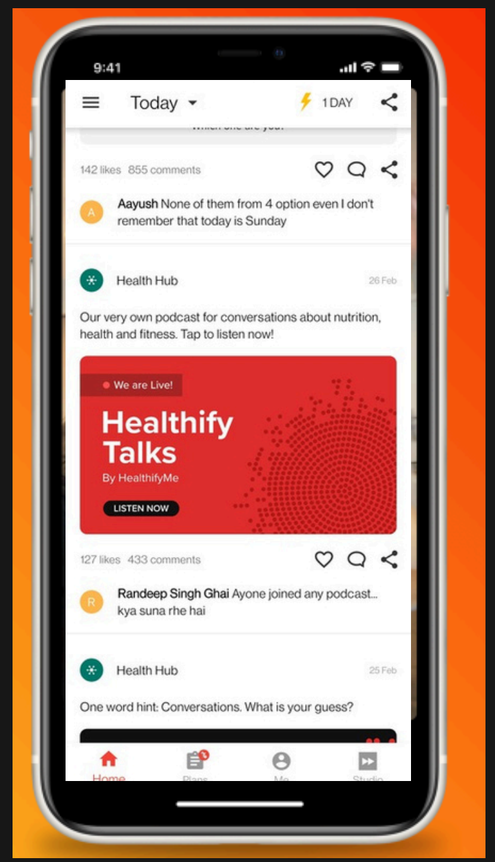

Solution 1

Community Hub

With this solution user will be able talk to other people and know about their journey how they achieved their goal. User will get health update through this hub. There will also be many post about health food recipes and much more.

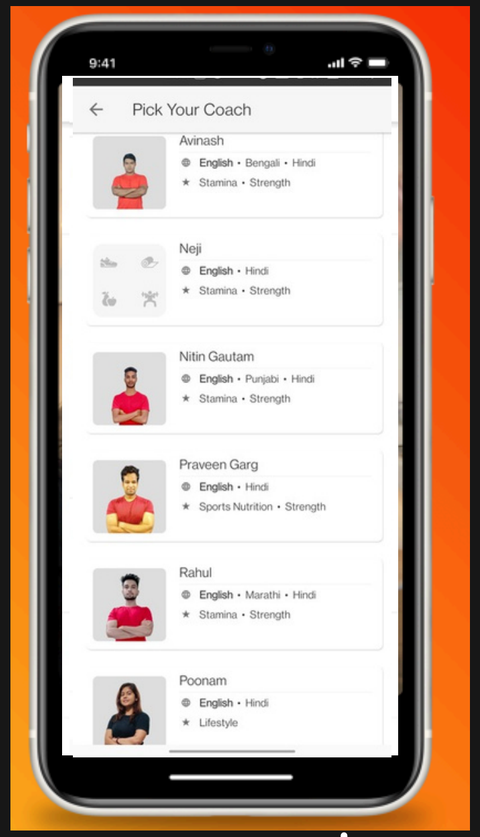

This feature will help user to connect with different people .With this feature people will be able to tell their story which will help people to motivate other people. Also the app will

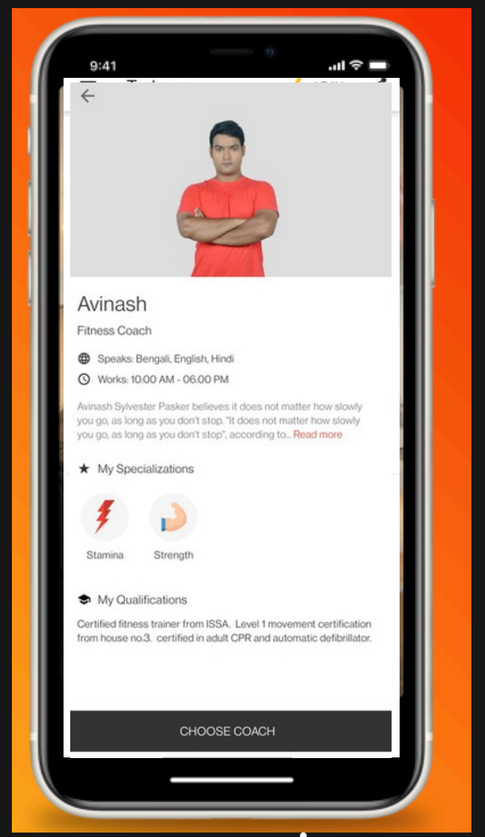

Solution 2

Personalised Trainer

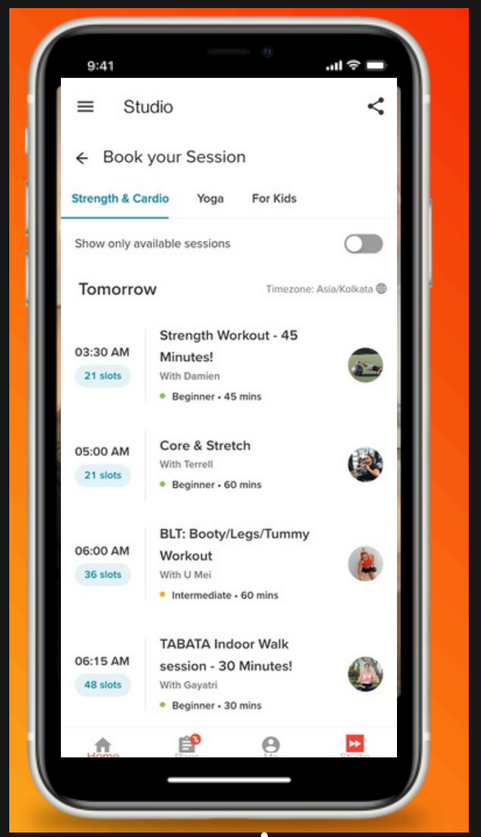

There are people who can only work when someone guides them.Our app will hire different types of trainer for every type of people. User can select from which trainer he/she wants to get guided and they would have to pay the trainers fee.

Here the user can choose from which trainer he/she wants to be trained.There will be all kinds of trainer

After selecting a trainer the user can see his/her profile.

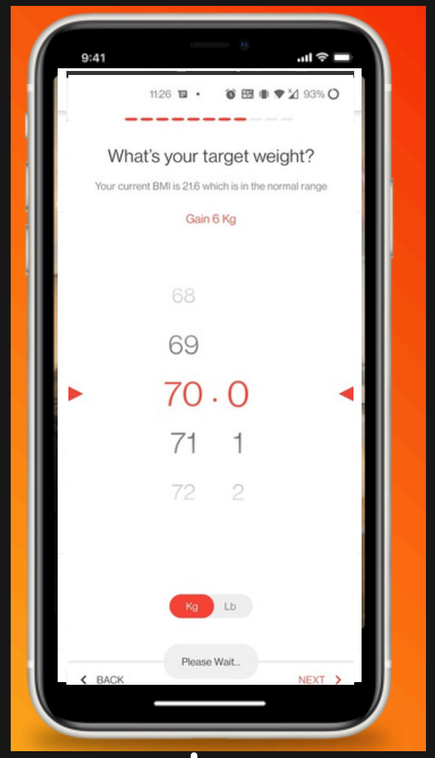

Use will also be able to attend live sessions on interesting topics from their favorite trainer.

Solution 3

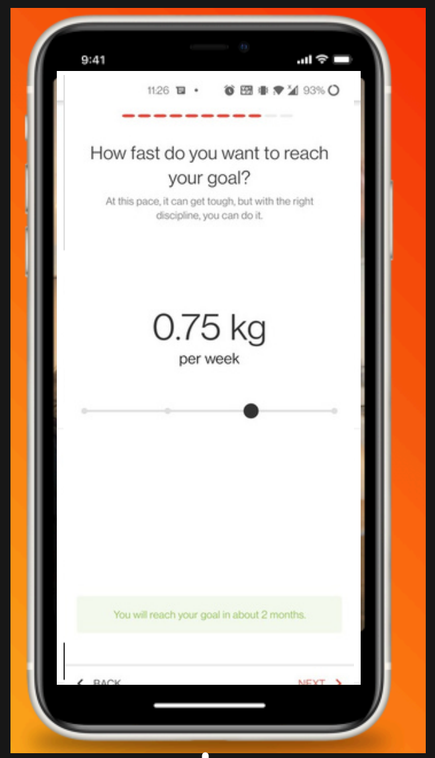

personalised goal and app

By collecting user data it would help us to personalise the app according to the user, and it will also help us to determine the goal and the time it will take to achive.

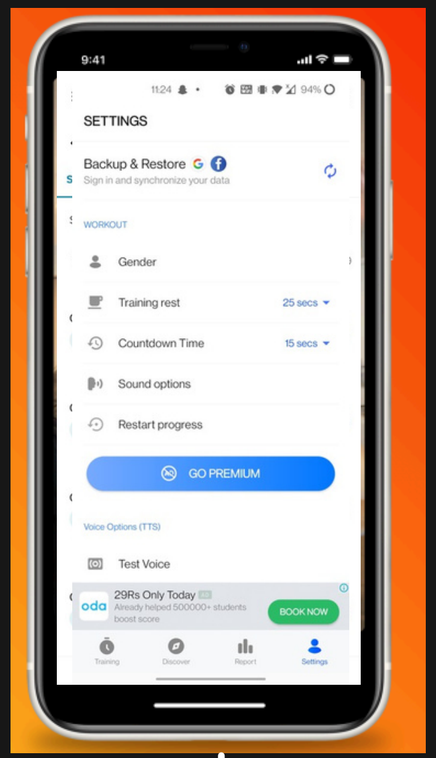

The app will be linked to Google fit so if any user wants to track his/her activity he can link the amazon fitness account to google fit.

Here the user can choose from which trainer he/she wants to be trained.There will be all kinds of trainer

After selecting a trainer the user can see his/her profile.

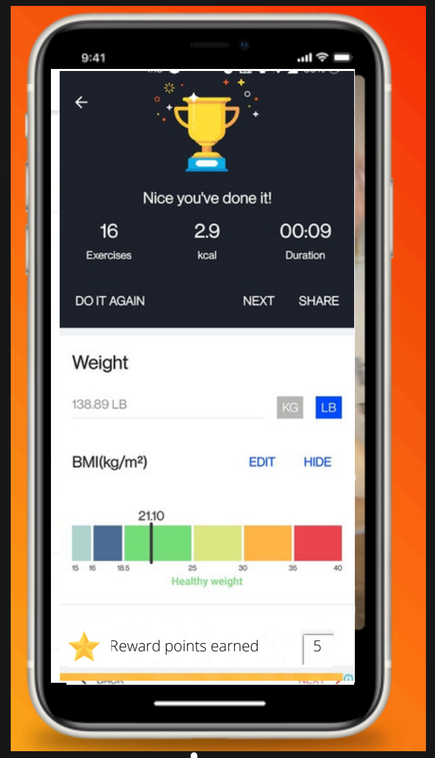

After selecting a trainer the user can see his/her profile.

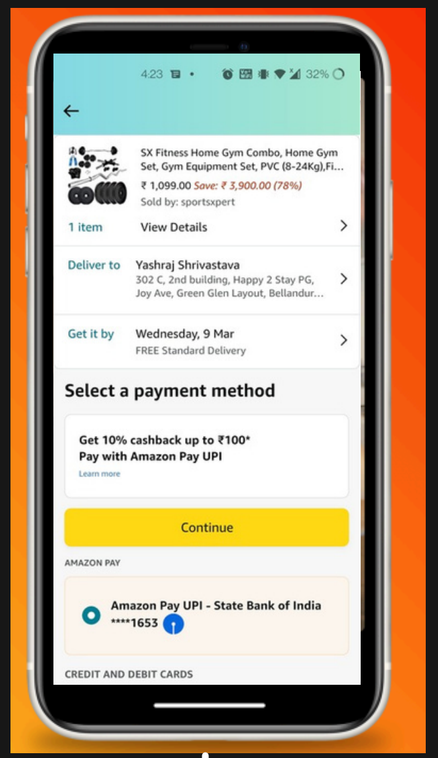

Solution 4

Gamification of the app

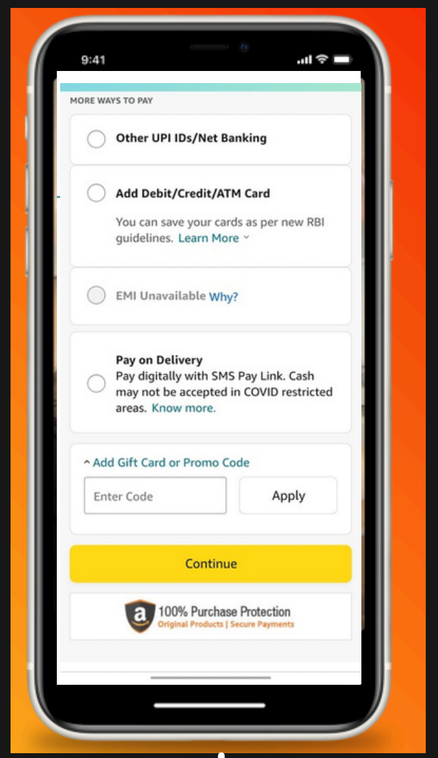

When ever a user complete a goal he/she will be rewarded with gift points. After collecting some gift points user can use this points in purchasing any fitness equipment from amazon.

After a user completes a the activity he or she will get some reward points which will allow them to purchase gym equipment on discount

After the user have valuable amount of reward points he will be suggested with gym equipment which are relevant for the user. Based on the data collected

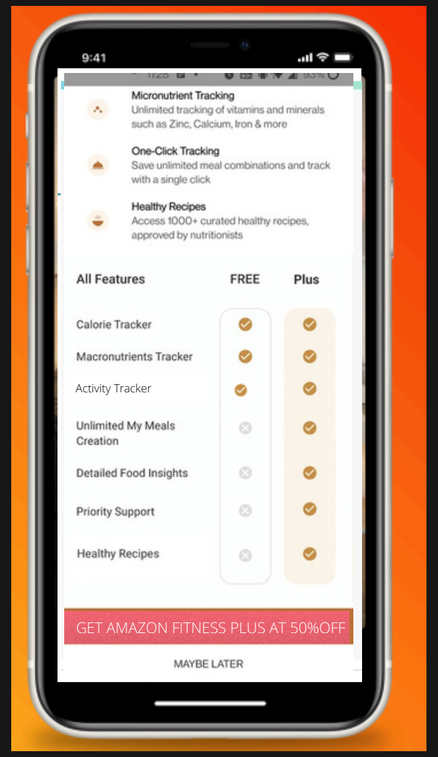

After the user selectes the equipment he/she wants to buy, they will be provided with a unique number which the user will use to get discount

Monetization strategy

User will get either take a free plan or a plus plan .
For the plus plan the user will have to pay 200 Rs.
User will also get some additional features with amazon prime membership.
In the case of the Fitness app, wee can set up agreements with companies selling health and fitness equipment, products and services.

Monetizing our fitness and workout application by allowing third-party vendors to sell their products through your app via advertisements is one way to generate money.

Market Size

The global gym industry is worth $96.7 billion in 2020, with more than 184 million gym members in total. 2020 is a true testament to the growing gym industry trends where the global gym industry is worth $96.7 billion.
